

LEADER IN MY LIFE (JAKY CHEN)

I think one leader in my life is my dad. He is a director in his company. He works for fashion, my mom and my dad have a restaurant and a ice cream store. My dad travel around the world to see different type of fashion and "fashion week". Including New York (he loves New York). So as you know that's my dad, my dad doesn't play with me a lot but I get it, he is hard (he leave at this Wednesday morning) . I think he is my leader because he work very hard at anything, he never give up.

When my dad was young:

LEADER (TSU CHUANG ZHI)

Tsu Chuang Zhi was a scientist, astronomer, writer and mathematician. He is the first one find out pi, pi is the ratio of the circumference of a circle. It never stop, it is 3.14159265359... Tsu Chuang Zhi he only discovered the seventh place. After he got beat by Al Casey, Al Casey discovered pretty much the whole number (I am not sure). Tsu Chuang Zhi give contribution to the math world. He also wrote a lot of poems. I think he is my leader in math, he is very smart, Risk- Taker and a thinker.

Adjective word for Tsu Chuang Zhi:

- Smart
- Never give up
- He was a very good learner (cause when he is small he is the number one in the class)
- Risk- Taker
- Inquire
- Thinker

Fun fact about pi:

In my old school I learned pi, my math teacher told me that in Chinese only in lower school, we use pi as 3.14.

Question:

- Do America do that too?
- When do America learn pi?

Tsu Chuang Zhi:

Pi:

$$\pi = 3.14159265358979323846264338327950288419716939967312337$$
A close-up photograph of a white surface with the Greek letter pi (π) and its decimal expansion. The pi symbol is large and bold, followed by an equals sign and the digits 3.14159265358979323846264338327950288419716939967312337. The digits are arranged in a slightly curved, overlapping pattern, suggesting they might be on a piece of paper or a screen.
